handy

The most hygienic way to open a door!

Handy is the device created by Nova-Ferr that allows the opening of doors and small gates without touching the handles or crash bars, reducing the chance of transmission of germs and bacteria.

Provided in a practical kit, easy to install and completely adjustable, it can easily be adapted to all kinds of handles for civilian, commercial and industrial use, both placed horizontally and vertically.

Available in two colours that match the different kinds of handles or crash bars, guaranteeing the visibility of the device.

Check out the HANDY assembly video on our YouTube channel: <https://www.youtube.com/user/novaferr> 

ASSEMBLY INSTRUCTIONS

ON HORIZONTAL HANDLES / CRASH BARS

Fix the support **D** on the bracket **A** by using the bolt **C**, interposing the plate **B** between **A** and **D**.

Secure **HANDY** to the handle by using the back-plate **F** and the gaskets **G** fixing them with the bolts **E**.

Once the adjustments are complete, insert the cover **H**.

ON VERTICAL HANDLES / CRASH BARS

Fix the plate **I** on the bracket **A** by using the bolt **C**, interposing the plate **B** between **A** and **I**.

Fix the support **D** to the plate **I** by using the washer **L** and fix everything with the bolt **M**.

Secure **HANDY** to the handle by using the back-plate **F** and the gaskets **G** fixing them with the bolts **E**.

Once the adjustments are complete, insert the cover **H**.
