# THE ADVANTAGES OF Agile2.0

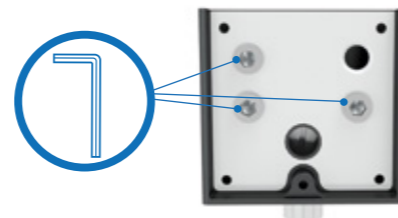

PINTLE AND GATE CLOSER  
IN ONE SINGLE PRODUCT  
=  
GREATER SAVINGS

## MECHANICAL SYSTEM

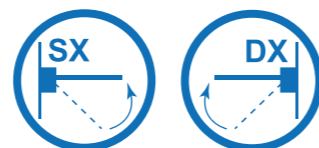

The mechanical movement of Agile2.0 allows the product to **need less regulations compared to standard hydraulics systems**, which are greatly influenced by temperature fluctuations.

The regulation is really simple: **you just need an Allen key!**

## REVERSIBLE

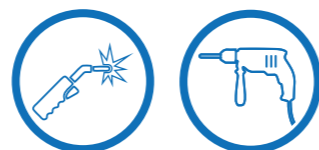

Agile2.0 can **change from right-handed to left-handed** (and vice versa) by simply switching the position of the springs.

## TO BE WELDED OR TO BE SCREWED

With the provided bushing, Agile2.0 can be **installed by welding or screwing** it on the gate leaf.

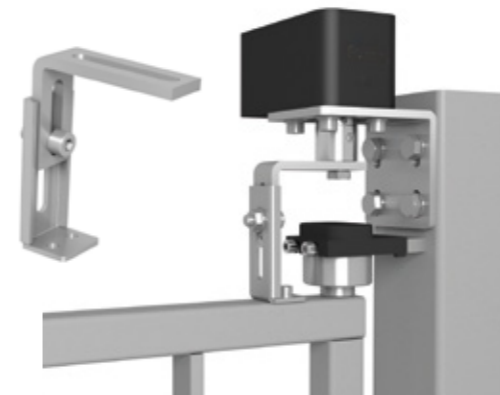

## CAN BE ADAPTED WITH PRE-EXISTING PINTLES

Agile2.0 can be installed, **solely with the gate closer function**, even with a pre-existing pintle:

When the gate closer can be mounted on the same axis with the existing pintle, the adjustable **L-bracket** is used.

When the Agile2.0 cannot be mounted on the same axis with the existing pintle, **the compass arm or the arm with guide** is used.

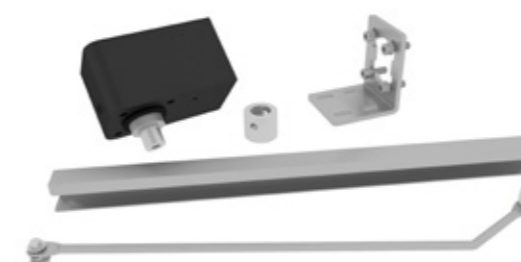

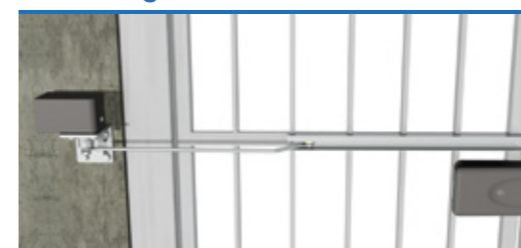

### With adjustable L bracket

### Compass arm kit

### Arm with guide kit

## GATE OPENER FUNCTION

Agile2.0 can be **easily transformed from gate closer to gate opener** by varying the position of the springs. This function works well with electric locks with remote control.

## RESISTANT

Thanks to the **cataphoresis treatment**, Agile2.0 is exceptionally resistant to weather agents.

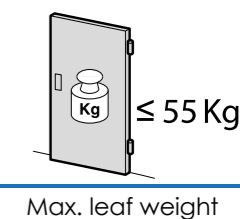

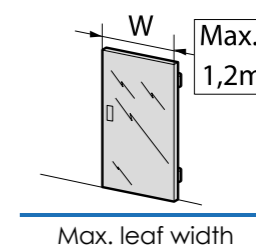

## ECO-FRIENDLY

**No oil to dispose of** thanks to its mechanical system.

All its components are recyclable.

## ADDITIONAL INFORMATION

### Available in two colours:

MICACEOUS BLACK  
BRIGHT ALUMINIUM

Agile2.0 has two main functions:

- Pintle
- Gate closer
